At JPMorgan Chase, we believe that being profitable and doing good works for the people and the world around us aren't exclusive of each other; they're integrated goals. When our business is strong and well governed, we're in a better position to translate positive financial results into sustainable community and environmental efforts that benefit everyone. This is the essence of corporate responsibility. Every day, we strive to make our firm a good corporate citizen -- and the most respected financial-services institution in the world. **Corporate Responsibility**

**Front End Applications Developer-170002577****Job Description**

**JPMorgan Chase & Co. (NYSE: JPM)** is a leading global financial services firm with assets of \$2.6 trillion and operations worldwide. The firm is a leader in investment banking, financial services for consumers and small business, commercial banking, financial transaction processing, and asset management. A component of the Dow Jones Industrial Average, JPMorgan Chase & Co. serves millions of consumers in the United States and many of the world's most prominent corporate, institutional and government clients under its J.P. Morgan and Chase brands. Information about JPMorgan Chase & Co. is available at [www.jpmorganchase.com](http://www.jpmorganchase.com).

J.P. Morgan is a global leader in asset management services. As the Asset Management line of business in JPMorgan Chase & Co., we serve four distinct client groups through three businesses: institutional and retail clients through Investment Management, ultra high net worth clients through the Private Bank, and high net worth clients through Private Wealth Management. With assets under supervision of \$1.7 trillion and assets under management of \$1.2 trillion, we are one of the largest asset and wealth managers in the world.

J.P. Morgan Asset Management is a leading asset manager of choice for institutions, financial intermediaries and individual investors, worldwide. With a heritage of more than two centuries, a broad range of core and alternative strategies, and investment professionals operating in every major world market, we offer investment experience and insight that few other firms can match. With clear focus on managing client assets and delivering strong risk-adjusted returns, more than 650 investment professionals provides over 200 different strategies spanning the full spectrum of asset classes, including equity, fixed income, cash liquidity, currency, real estate, hedge funds and private equity and take leadership positions in America, U.K., Continental Europe, Asia, and Japan.

The Investor Connect engineering team is looking for great front-end engineers who bring fresh ideas from all areas to join us in building innovative financial technology that transforms the way our wealth managers meet our client's needs around the globe. Our objective is to rapidly prototype app concepts, validate with end users and push designs into development sprints as efficiently and effectively as possible. The environment is fast paced and there is a strong commitment to delivering the best possible solution. UX is at the forefront of this initiative, and our teams work to apply a consistent styling and logic to everything we produce.

- Front-end design, development for financial software
- Follow and promote Agile practices like SCRUM and BDD
- Research new technologies, identify and learn best practice, adapt quickly and provide technical guidance to other team members
- Work with multiple globally distributed teams to deliver solutions across regions
- Advise, collaborate with, and synthesize feedback from Wealth Managers and Product Desks
- Presenting and demoing to users, stakeholders, and technology groups
- Promoting excellent user experience and system performance

**Qualifications**

- 5+ years of experience designing and building innovative user experiences using HTML, CSS, and JavaScript
- Build custom JavaScript MVC apps in Node, React/Flux, Angular, Webpack, Less/Sass, etc
- Design advanced UI components using animations, transitions, and interactive infographics
- Utilize tests, code reviews, continuous integration, command-line programming
- Define, code, test and deploy new features with an emphasis on extensibility and performance
- Exposure/ competence with Agile Development approach
- Integrate back-end services such as HTTP, web sockets
- Extensive experience working as a UI or Frontend Developer within a software development environment
- Must possess excellent interpersonal skills including strong written and verbal communication
- Provide leadership on front-end technologies, design guidelines, code conventions, research & development, trends

**Preferred Qualifications**

- RESTful API design, service oriented architecture expertise
- Experience in building Java Spring apps
- Business Driven and Test-driven development experience
- Scrum methodology experience
- Knowledge of HTML canvas.
- Knowledge of data persistence technologies.
- Knowledge of secure web protocols HTTPS/SSL/TLS
- Familiar with GIT, npm, Jenkins and UNIX scripting
- Financial Industry experience.
- Exposure to Atlassian tracking, collaboration and code quality tools
