Principles Guiding our Business

At JPMorgan Chase, we believe that being profitable and doing good works for the people and the world around us aren't exclusive of each other; they're integrated goals. When our business is strong and well governed, we're in a better position to translate positive financial results into sustainable community and environmental efforts that benefit everyone. This is the essence of corporate responsibility. Every day, we strive to make our firm a good corporate citizen -- and the most respected financial-services institution in the world. **Corporate Responsibility**

Job Description

JPMorgan Chase & Co. (NYSE: JPM) is a leading global financial services firm with assets of $2.6 trillion and operations worldwide. The firm is a leader in investment banking, financial services for consumers and small business, commercial banking, financial transaction processing, and asset management. A component of the Dow Jones Industrial Average, JPMorgan Chase & Co. serves millions of consumers in the United States and many of the world's most prominent corporate, institutional and government clients under its J.P. Morgan and Chase brands. Information about JPMorgan Chase & Co. is available at www.jpmorganchase.com.

J.P. Morgan Asset Management is a leading asset manager of choice for institutions, financial intermediaries and individual investors, worldwide. With a heritage of more than two centuries, a broad range of core and alternative strategies, and investment professionals operating in every major world market, we offer investment experience and insight that few other firms can match. With clear focus on managing client assets and delivering strong risk-adjusted returns, more than 650 investment professionals provides over 200 different strategies spanning the full spectrum of asset classes, including equity, fixed income, cash liquidity, currency, real estate, hedge funds and private equity and take leadership positions in America, U.K., Continental Europe, Asia, and Japan

The Service and Operations technology group within Wealth Management and Investment Solutions (WMIS) is looking for an UI developer to become part of our global technology team.   In this role, you will design, develop, code, test, debug and document programming applications to satisfy requirements. You will work closely with business analysts and other developers. You will research and evaluate alternative solutions and make recommendations. You will work closely with internal technical team(s)during the build and testing phases of the project as well as during the support of the production implementation.

Responsibilities:

- Build UI for WMIS service and ops applications leveraging Java Script technologies such as AngularJS/ReactJS
- Integrate UI will rest layer
- Partner heavily with technology partners, including business analysts, release management, infrastructure, and other developers, at all levels
- Utilize Agile methodology and adhere to coding standards, procedures and techniques while contributing to the technical code documentation
- Provide high quality technology solutions that address business needs developing applications within mature technology environments.
- Design, develop, code, test, debug and document.
- Review design and functional specification prepared by other team members
- Manage code quality for total build effort.
- Coordinate with end users during User Acceptance Testing
- Analyze and document problems, recommend solutions, and initiate corrective action.
- Support production rollouts of the functionality on-site by partnering closely with the Operate team

Qualifications

- 3+ years of IT experience
- Familiarity with standard development tools, preferably Eclipse IDE, Subversion and Continuous Integration concepts/tools
- Broad Information Technology experience, including understanding of development tools, processes and best practices of application development.
- Experience with full lifecycle software development
- Expert level experience with JavaScript Coding
- Experience with EXT JS, Angular JS, REACT JS, Web Components, D3 9(or Similar)
- Experience with Web Services (RESTful services) for service later integration.
- Experience with JSON/ASYNC/ Single page App programming.
- Experience with modern client-side web application technologies, including HTML5, CSS3.
- Experience with databases Oracle, Nosql, Sybase is preferred.
- Experience with UI Design and UX concepts.
- Unix command skills is preferred.
- Knowledge of testing frameworks like Mockito library.
- Financial experience is a plus.
- Bachelors' degree in Computer Science

JPMorgan Chase is an equal opportunity and affirmative action employer Disability/Veteran.
